Re: Victoria International Marina and Port of Victoria Yacht Facility

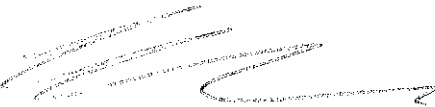

VIH Aviation Group operates from a head office at Victoria International Airport. Within this group of companies are sixty-five helicopters, three hundred plus employees and an extensive system of support infrastructure located in Canada's west coast, the Arctic coast, Newfoundland, Alaska, Louisiana, Peru, Taiwan and mainland China. Within VIH Aviation group there are three specific companies that would receive a positive economic impact from your proposed marine development. These companies are VIH Helicopters Ltd., VIH ExecuJet, and YYJ-FBO (Fixed Base Operator at Victoria International Airport).

The services provided by these three companies are: Helicopter charter services; Executive charter jet services; and the FBO service which is a first class facility designed to receive and handle high end clients and guests arriving/departing Victoria Intl. Airport by charter and/or corporate executive jets who need fueling, parking and passenger handling;

The first class mega yacht marina that you propose would attract additional high end visitors to Victoria and create an economic ripple effect with positive benefits to our above mentioned businesses. If the economic spin-off benefits our group of companies then I am sure it will bring significant and positive economic benefits to a substantial number of other local businesses.

I am pleased to have this opportunity to show my support in the advancement of this project and wish you every success.

Sincerely,

Ken Norie
President
